

THE AI-AUGMENTED DEVELOPER:

Mastering Vibe Coding Workflows

Hands-on training for developers to harness AI tools, supercharge productivity, and build better software.

DATE:

4th to 5th July 2026

VENUE:

R-03, Bandar Sri Putra Bangi, Palmera Residensi,
Laman Puteri 3, Bandar Puteri Bangi,
Kajang, 43000 Selangor

**RM
1,990
PER PAX**

WHO SHOULD ATTEND?

Software Developers:

Those wanting to integrate AI tools into their coding process to boost efficiency

Tech Enthusiasts:

People curious about AI's role in software development and tools like *GitHub Copilot*

Backend & Frontend Developers:

Developers working on full-stack projects using AI for design and coding

Project Managers:

Managers who want to understand how AI can speed up development & improve quality

Anyone Curious About AI:

Those wanting to learn how AI helps with coding, from prompt engineering to code review

Students & Learners:

Tech students or anyone wanting to enhance their skills in AI coding & full-stack development

WHAT YOU'LL LEARN?

Hands-on experience with top AI-powered coding tools like *GitHub Copilot* and *Google Antigravity*

Master full-stack development by building real-world projects with AI assistance, from architecture planning to frontend integration

Learn to craft effective prompts for AI to generate high-quality code, while improving your code quality & debugging skills.

Explore advanced features for improving performance, debugging, & security in AI-assisted development

Gain valuable insights into using AI to automate repetitive tasks and optimize your coding workflow
